

Announcement

World Meets Energy
SMART ENERGY WEEK

15th

WIND EXPO

国際 風力発電展

Towards carbon neutrality by 2050, wind power is emerging as a key energy source. For Japan, surrounded by ocean, offshore wind generation is a promising option to boost electricity production while minimizing land use.

Outline of the event

Date	Feb. 19-21,2025
Time	10 : 00-17 : 00
Place	Tokyo Big Sight / East-South Hall
Booth No.	E18-22
Website	WIND EXPO official website 

※Admission is free, but **pre-registration** is required.

Details

Daimon × **KohanKogyo**

We will be exhibiting **resin protective tubes for underwater cables** to prevent abrasion during seabed contact and landfall. Additionally, you will see tools for quick and stable banding strength using air motors, along with **high-corrosion-resistant stainless steel straps and sealing systems**.

We invite you to visit our booth and look forward to seeing you!

KohanKogyo
